

Paul Elsberg
Usability Test
website used for this project [SQL](#)

Introduction

Hello my name is Paul and today we'll be testing the usability of a website. We're doing this to help improve the site to make it easier to navigate. Keep in mind that there are no wrong answers as we're testing the *site*, not you. It is encouraged that you speak your mind freely and think out loud about your experience as you navigate the site. Please feel free to ask questions but we'd like to see you attempt to answer a task before asking. With your permission (permission was granted) we are going to record take note of the results but this content will only be accessible by myself and my web programming teacher. Giving us your honest opinion will help to improve the site for others.

Questions

Before we start I'd like to ask you a few questions

What data are you most dependent upon and why?

Weather (looks at it every day). Money and transaction data as well

What websites do you use that store your information?

Facebook, gmail, amazon, youtube

Where do you store your personal data such as passwords and confidential user info?

My head and on a stickie note widget

How many hours a day do you spend on the internet?

3 at least

What websites occupy the largest amount of your time and why?

Streaming services because watching things takes time

Home Page Tour

Ok so now let's get started! I'm going to open a web page and ask you a few questions.

Feel free to scroll the page but please don't click on anything quite yet.

So to start I'm going to ask you to describe what you think this web page is about?

Storing data about people in a band

What particularly interests you or is eye catching about the page?

When it first opens the fields where I have to enter something because of the red asterisk and the table itself

Can you describe what you like and dislike the layout of the page?

I like how simple it is but I don't like how there is no explanation or briefing of what it is

What is the first thing you would click on?

Name field to enter

Tasks

1. Enter a new musician. Was it a success?

Yes the information I entered was in the table

2. Update an existing musician. Was it a success?

Yes, it changed the years I updated

3. Delete a musician, Was it a success?

Yes it's no longer there

4. Resort the musicians based on instrument?

Ya I clicked it and it appears to have worked

Summary of Changes To Be Made

1. Add a title and description (will do this before submission)
2. Add title to update and insert forms so I know which one I'm using (will do this before submission)
3. Add description to click on buttons to reorder the table (will do this before submission)
